This overview covers all the key dimensions for the installation of the Gliderol range of garage doors.

Glidermatic doors require an extra 20mm side clearance on the side the drive unit is required to be fitted.

Sizes - GlideRol-a-Door up to 5m wide and 3m high. GlideRol-a-Door Mini up to 3.4m wide and 2.1m high.

Windlock system - should be specified for double doors in very exposed locations and greater side room clearance is required. For advice and information, speak to our technical department or your supplier.

---

**Technical**

**Fixing within the opening**

**Fixing behind the opening**

If recommended headroom is not available the door may still be installed, required headroom should be maintained (n.b. some loss of opening height will occur and the roll of the door will be visible, but this may be disguised by a fascia).

---

**Notes on colour:** Door guides are available in colours matching the door curtain except laminate door colours (supplied in brown). Coloured guide rails are supplied as standard, however they may not match the lath colour. The manufacturing process for the lath profile results in a textured finish, whilst all other coloured items (guides, bottom rails, lock rails, optional fascias and vision panels) are supplied in a satin finish so cannot be guaranteed to match exactly. Over time, some scuffing may occur on front and rear surfaces of doors as a result of their normal operation.

Notes: A portion of the bottom rail will be visible below the top rail of the opening when the door is in the open position.
