TECKENTRUP 62 SWING SECURE.

The secure & stylish swing garage door for your home.
STYLISH, SECURE
A CLASSIC, UPDATED

TECKENTRUP 62-1 SWING SECURE
Single leaf versions for side access to your garage.

TECKENTRUP 62-2 SWING SECURE GARAGE DOOR
Double leaf versions provide easy access and performance comparable to your front door.
The main entrance doors to homes are becoming more attractive and high performance. Hinged swing garage doors, whilst still a popular choice, are limited in choice and performance.

The Teckentrup 62 Swing Secure brings crisp aesthetics and comparable performance to the main entrance door; Thermal Transmittance, Resistance to Windload, Watertightness, Air Permeability and Operating Forces are all certified in these high performance doors.

Add to this, the option of certified security to the Secured by Design Police Preferred Specification, and Teckentrup 62 Swing Secure garage doors are a classic, updated for today’s homes. The superb build quality of the double leaf doors is complemented by matching single leaf doors for side or rear access to your garage space.
A black lever handle and security keyed cylinder is the standard configuration for all doors. Stainless steel is available and an option - see image on page 6.

Stainless steel pull handles in two lengths can also be added in singles or pairs to add a striking contemporary look to your door.

Add certified security to The Secured by Design Police Preferred Specification.
The door and frame are CE marked and have been independently tested to have the following impressive characteristics:

- **Insulation (Thermal Transmittance)**
  - EN 13241-1 B: 1.4 Wm²K

- **Resistance to Windload**
  - EN 12424: Class 2

- **Watertightness**
  - EN 12425: Class 2

- **Air Permeability**
  - EN 12426: Class 2

- **Operating Forces**
  - EN 12604: 150N

- **Operating Cycles**
  - EN1191 C5 [200,000]

- **Security (optional)**
  - EN1627/30 RC2 or Secured by Design Police Preferred Specification

*U value includes a 3mm clearance gap under the door.*

Image shows the stainless steel handle option.
Each door is supplied with a pair of Security keys. Security keys add extra security by preventing unauthorised copying. They cannot be cut by anyone other than the issuer of the key - Teckentrup.

For improved weather protection, a stepped aluminium threshold with a bulb weather strip is provided. The door leaves close against the raised weather strip creating an improved barrier to dust and debris. The threshold is DDA compliant for wheelchair access.

Every door is supplied with a frame. A ‘block frame’ is the standard option with two variants, the ‘Corner Frame’ and the ‘Corner Counter Frame’. Each frame is made from heavy gauge corrosion protected steel and provides a stable platform for the door to operate.

The inactive leaf is secured with flush bolts to the top and bottom of the leaf.

Double doors have foot activated stays to hold the door in the open position.

Please note - stays are not designed for high wind applications.

An anodised aluminium rain-guard is supplied with all doors. Help limit water ingress at the top of the door.

Please note - stays are not designed for high wind applications.

Doors are available with independently certified security to the Secured by Design Police Preferred Standard.

The FB Frame option allows for a flush finish between door lip, frame and wall finish on Corner and Corner Counter frames in new openings that are rendered after the door is installed. The FB option also provides a flush finish on block frames that are fixed at the front edge of the garage opening reveal.
